

ETR2-1550 Controller

Overview

The Warmup outdoor heating controller allows for economic regulation of snow melting systems on ramps, driveways as well as in channels and gutters.

Ideal for many installations it can control up to 16 amps of heating and accommodate two sensors simultaneously which will detect both external temperature and humidity.

It will constantly monitor the area you want to heat and will only provide heat when snowfall or ice formation is detected.

The world's best-selling floor heating brand™

Technical Data

TECHNICAL DATA

OPERATING VOLTAGE	230v AC \pm 10% 50-60Hz
IP RATING	IP20
MAX LOAD	16A - (Potential-free contact, NO)
RUN-ON TIME	0-5 hours
TEMPERATURE RANGE	0°C / +50°C
DIMENSIONS	86 x 52 x 59mm (HxWxD)

Features

- CE and UKCA marked for ultimate peace of mind

- Suitable for outdoor heating only

- 3 Warranty

WARMUP COMPONENTS

Additional Components

- WSM - Snowmelt
For concrete applications

- WSM- Snowmelt
For asphalt applications

- ETO2 Controller
Up to 48 Amps

- ETF-744/99 Sensor
External air sensor

- ETOR-55 Sensor
Gutter sensor

- ETOG-55 Sensor
Ground sensor
